-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

- 6) ☐ Other: ____.

DETAILED ACTION

Drawings

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the filter of claims 4-6 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

The drawings are objected to because Fig. 1 should show ports 30, 32 and 34 in phantom; and Fig. 3 should add numerals 40, 42, 56, 58, 60, 62 and 64. A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Specification

The disclosure is objected to because of the following informalities: Page 8, line 3, "the", first occurring, should be --they--. The description on page 8, lines 1-4 is questioned because even though there will always be a vane between inlet ports 30 and 32, port 30 opens into inlet 36 so that the vane chamber adjacent inlet port 32 will also be open to inlet port 30 through inlet 36. Clarification is required.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-3, 7 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Jurr. The reference discloses a rotary vane pump comprising a housing having a sound chamber and defining a primary inlet port (9), a secondary inlet port (6) spaced from the primary inlet port and an outlet port (12); an eccentrically mounted rotor (2) having a plurality of sliding vanes; wherein the sound chamber has a plurality of partitions defining a plurality of cavities (5, 11, 17, 19), the partitions having passageways (16, 18) for communication of air from an intake port (15) to the primary and secondary inlet ports, and wherein the air enters the secondary inlet port after passing through at least two of the plurality of cavities as claimed.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jurr in view of either Yumiyama et al. (Yumiyama) (Fig. 4) or Csas (Fig. 1). The claims add that at least one of the plurality of cavities contains a sound filter. The secondary

Art Unit: 3748

references teach that it is well known to provide cavities with sound filters (unnumbered but shown in cavities 9b, 9c, 9d in Yumiyama, and 8 in Csas). It would have been obvious to one having ordinary skill in the art to add a sound filter, as taught by either Yumiyama or Csas, to at least one of the cavities of Jurr to increase the sound damping in the sound chamber.
